

# DIAH FITRIANINGRUM

Full-Stack & Integration Developer | CI/CD & Developer Productivity

081386394962 | diahfn26@gmail.com | linkedin.com/in/diah-fitrianingrum | Jakarta, Indonesia

## PROFESSIONAL SUMMARY

Full-Stack & Integration Developer with 4 years of experience building and maintaining the engineering systems behind enterprise operations — CI/CD pipelines, API gateways, middleware, and internal tooling. I've led a full platform migration end-to-end with zero downtime, built GitLab CI pipelines to automate build and deployment, and shipped 15+ APIs and 20+ UI features that cut manual work and query times for real users. I care about making engineering workflows measurably faster and more reliable, and I'm actively expanding into TypeScript, Golang, and cloud-native architecture.

## WORK EXPERIENCE

**Full-Stack & Integration Developer — PT Integrasi Logistik Cipta Solusi** *Sep 2022 – Present | Jakarta, Indonesia*

### **Developer Experience, CI/CD & Middleware**

- Built and maintained a GitLab CI pipeline that automated build and deployment of IBM ACE integration artifacts across dev and production, removing a previously manual release step for the team.
- Led the full migration of production integrations from Software AG to IBM ACE/APIC — completed on schedule with zero data loss and no service disruption during cutover, the kind of high-risk, high-leverage change that required deep trust from the rest of engineering.
- Architected and delivered 10+ integration gateways connecting 5+ enterprise systems in real time, and standardized API traffic, routing, and authentication for 15+ services via Kong Gateway, cutting unauthorized access incidents.
- Maintained code quality and cross-team collaboration through Git-based version control and code review across all integration and application projects.

### **Full-Stack Development**

- Designed and shipped 5+ enterprise web applications from the ground up, and 20+ ReactJS UI components/features for a port terminal management system used daily by 50+ operators.
- Built and maintained 15+ RESTful Node.js APIs on Oracle DB, optimizing queries to cut average query time by ~25% — a direct, measurable improvement to how fast the system responded for its users.
- Resolved 30+ production bugs across the stack, reducing critical incident frequency by ~40% and improving day-to-day stability for the whole engineering team.
- Owned features end-to-end across the full SDLC — requirements through deployment and post-release maintenance — delivering on time across 5+ project cycles.

**Merchandiser — PT Indomarco Prismatama**

*Nov 2018 – Jun 2021 | Jakarta, Indonesia*

- Managed inventory flow, cashier funds, and daily financial deposits to head office, ensuring accurate record-keeping across multiple shifts.

## TECHNICAL SKILLS

**CI/CD & Tooling:** GitLab CI/CD, Git, GitHub, Postman, IBM ACE Toolkit, Visual Studio Code

**Integration & Middleware:** IBM App Connect Enterprise (ACE/IIB), IBM API Connect (APIC), Kong Gateway, Software AG, ESQL, SOAP, REST

**Frontend / Backend:** ReactJS, JavaScript, TypeScript (learning), Node.js, Golang, HTML, CSS

**Database:** Oracle, MySQL, PostgreSQL, SQL (queries, stored procedures, optimization)

**Concepts:** OOP, RESTful API Design, API Gateway, Middleware & Platform Migration, Full SDLC, Agile, Data Structures & Algorithms

## EDUCATION

Universitas Terbuka (UT) — Information Systems

## CERTIFICATIONS

- Getting Started with Go — University of California, Irvine (Coursera), Dec 2025
- Fullstack JavaScript Bootcamp — DumbWays Indonesia (Top 20 of 2,000 selected participants)

## ORGANIZATION & VOLUNTEER

- Volunteer — Dompot Dhuafa / Polinema Care (Nov 2022): supported mental health awareness campaigns and emergency preparedness training.
- Volunteer — IndoRelawan (Jul 2021 – Aug 2021): monitored medicine availability and supported community health needs during the COVID-19 pandemic.

## LANGUAGE

---

Indonesian — Native | English — Professional Working Proficiency (Advanced)
