PROFESSIONAL SUMMARY

Full-Stack & Integration Developer with 4+ years of experience building enterprise middleware, CI/CD pipelines, and web applications for logistics platforms. I've led a legacy-to-modern platform migration with zero downtime and optimized systems that cut average response time by 25%. My work bridges enterprise integration (IBM ACE, APIC, Kong) with full-stack development (ReactJS, Node.js).

WORK EXPERIENCE

PT Integrasi Logistik Cipta Solusi | Full-Stack & Integration Developer

Sep 2022 – Present | Jakarta, Indonesia

- Architected 10+ API gateways via Kong Gateway and IBM APIC, standardizing security and routing for 15+ services and reducing unauthorized access incidents.
- Led the end-to-end migration from Software AG to IBM ACE/APIC with zero data loss and no service disruption during cutover.
- Built GitLab CI pipelines automating builds and deployments for IBM ACE artifacts across dev and production servers.
- Developed 15+ RESTful APIs using Node.js and Oracle DB, optimizing SQL queries to cut average response time by 25%.
- Shipped 5+ enterprise web applications using ReactJS, including 20+ reusable UI components used daily by 50+ port terminal operators.
- Resolved 30+ production bugs across frontend and backend layers, reducing critical incident frequency by 40%.
